## CREATING A VIRTUAL MACHINE (VM) IN MICROSOFT AZURE:

Creating A Virtual Machine (Vm) In Microsoft Azure Involves The Following Steps:

1. Sign in to the Azure portal.
2. Navigate to "Create a resource" and select "Virtual Machine."
3. Choose a subscription, resource group, and region.
4. Configure VM settings, including size, OS, and storage.
5. Set up networking, security, and management options.
6. Review and create the VM, then monitor its deployment.

The VM will be ready to use after deployment.

## CREATION OF STORAGE ACCOUNT IN MICROSOFT:

To Create A Storage Account In Microsoft Azure, Follow These Steps:

1. Sign in to Azure Portal.
2. Create a Resource
3. Configure the Basics
4. Set Advanced Options
5. Review and Create
6. Access the Storage Account
7. After deployment, access the storage account to manage containers, blobs, files, tables, or queues.

Home > **Storage accounts** ✨ ...

## MANAGING OF STORAGE ACCOUNT

To Upload An Image Into A Container In An Azure Storage Account, Follow These Steps:

1. Access the Storage Account: Sign in to the Azure portal and navigate to your Storage Account.
2. Create a Container: In the Storage Account, select "Containers" and click "Add Container." Name the container and set the access level (private, blob, or container).
3. Open the Container: Once created, click on the container to open it.
4. Upload the Image: Click the "Upload" button within the container. In the upload window, browse your local machine to select the image file.
5. Configure Upload Settings: Optional - You can set advanced upload options like overwriting existing files, setting metadata, or assigning blob tier.
6. Start the Upload: Click "Upload" to start the process. Once the upload is complete, your image will be stored in the container and accessible based on the access level you set.

**AFTER UPLOADED THE IMAGE :**

**URL PATH OF IMAGE :**

C:\Users\NGP\Pictures

**OUTPUT :**

**STATIC WEB PAGE :**

**Deploying a Static Web Page on Azure  
Using Azure Static Web App:**

**Prepare Your Site:** Develop your static site and push it to a GitHub repository.

**Set Up Azure Static Web Apps:**

1. Sign in to [Azure Portal](#).

2. Click **Create a resource > Static Web Apps**.
3. Connect to your GitHub repo and branch.

### Deploy and Access:

1. Azure deploys your site automatically.
2. Access it via the provided URL.

### Access Your GitHub Pages Site :

#### Visit Your Site:

Open a web browser and navigate to <https://github.com/Smdarsathparwesh/sample-Portfolio-.git> - You should see your static web page displayed.

#### OUTPUT :
